

OUR LOVE

(Bieri/Wiederkehr)

Our love comes from far away
Much more than we imagine
We're actors in our own life-play
But one day I will go back again to see my family
And i know I will find you there waiting, just waiting for me.

Our lifes are full of surprises
Strangers first met, then get lovers
Isn't it curious, tell me isn't it strange?
That i feel as I knew you before much before than we met?
And your love is as natural without effort I can get.

Our love comes from far away
There somewhere from the stars
We came here to make change the play
But one day we will go back again to see our family
What a glorious day what a heavenly joy it will be!

Our souls are full of surprises
Missing the time on the earth
Isn't it curious, isn't it strange?
That we go back again and again always facing the pain?
We forget who we are and put ourselves in a very big chain.

Our love comes from far away
Much more than we imagine....
